

What Sets Us Apart

Core Components of Digital Service

Our holistic offering combines **digital tools** and **remote services** with the **expertise** of our people and the core **advanced technologies** available through our broad portfolio of water and process offerings.

Digital Tools

- Sensors
- Controllers
- Analyzers

Technology Portfolio

- Inventory
- Analytics
- Optimization

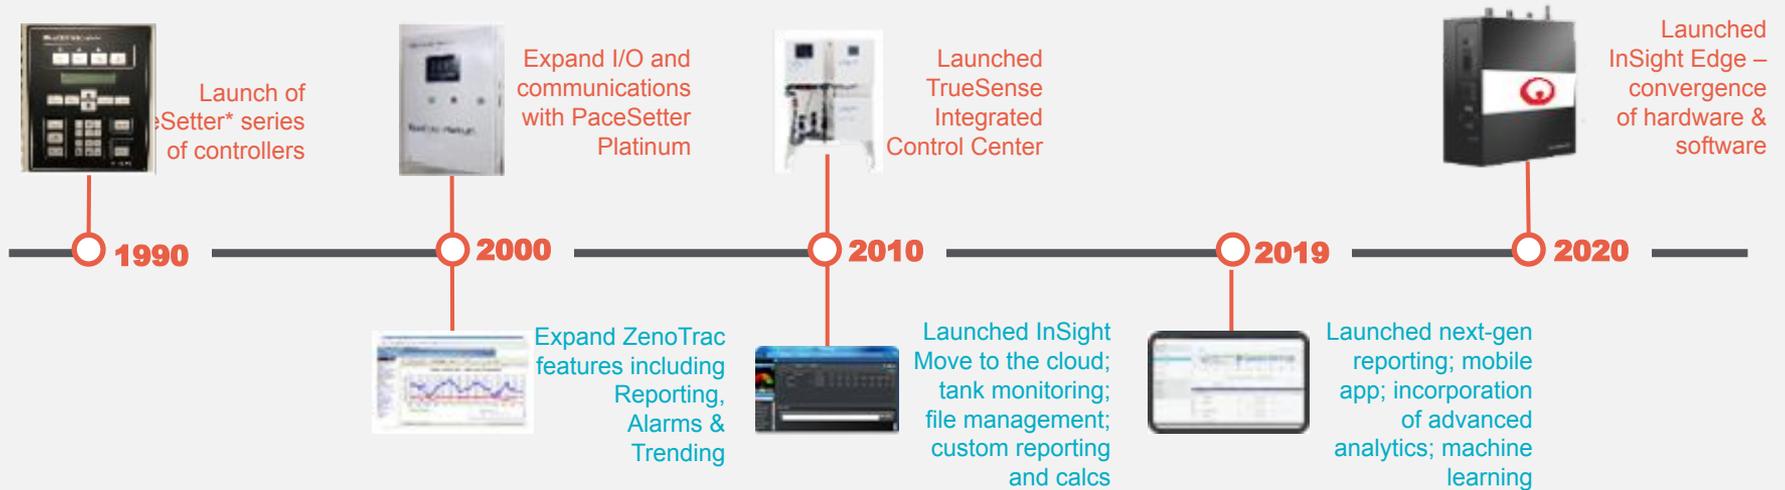

Technical Expertise

- Service Reliability Centers
- Process Analysts
- R&D

Leading the Transformation

History

We have 30+ years of experience in developing next-gen hardware and software solutions. Taken together, these innovative solutions comprise one of the leading IoT offerings in the water industry.

Our Industrial IoT Solution

Our integrated offering combines hardware and communications devices with advanced software and analytics capabilities to help uncover new ways to enhance operational efficiency and maximize asset performance.

Veolia IoT Technology Stack
